Become a Transformational Teacher...

"Though experience does matter, it matters only to the extent that a teacher commits to continued professional development to refresh his or her status as a transformational teacher..."

-david cutler
edutopia

Sessions at a Glance...

The teacher workshop is designed to hone your skills as a transformational teacher. Each session is designed to help you build students' capacity; through developing skills and structures that fosters their understanding. We have devised an array of practices that will help inform every lesson within any curriculum or instructional best practice. Our sessions include practicing and developing strategies to learn from your students via Formative Assessments.

Planned intentionally for student growth across grades by planning vertically aligned lessons. Go deeper with content (math & science) and create rigorous lessons, ready for your return to school.

Most of all join us in planning the next generation of thinkers, and expanding your impact by developing informal education Programs in your school. We look forward to seeing you!
